Lab 9 Python Deques
UWYO COSC 2030

1 Lab: Python Deques

This lab will introduce you to python deques, the functions essentially the same as C++ deques, though their function calls are different.

2 Intro to Python Deques

- https://www.geeksforgeeks.org/deque-in-python/

3 Lab: Assignment

Complete the supplied functions for rever and parenCheck, we have done these two functions twice before so refer to lab assignments 4 and 5 if you need a reminder. The point redoing this is to help get you comfortable with python and syntax while introducing deques.

4 Turn in on Github. Make sure you include a readme with your name and lab section.
